Two-Way Talk – 24/7 Recording and Monitoring

Smart Detection, Secured Home

Cameras are capable of accurately identifying people, vehicles, and pets by analyzing their shapes and providing real time-alerts. This minimizes false alarms and gives you peace of mind.

Double Warning for the Unwelcome

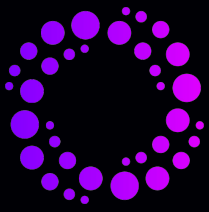

Once an intruder is detected, the camera's spotlights and siren will be triggered or manually activated to warn off the would-be criminal. Stop the crime before it happens.

Rich Details with 4K UHD

This 8MP security system delivers excellent images and videos with the finest and most minute details. Enjoy the immersive visual experience with 4K clarity.

Professional Installation, setup and configuration.

Special good for month of October 2024

Capture the Bigger Picture

See more of what matters with the expansive 145° field of view. Equipped with a 2.8mm lens, each camera in this system captures a wider area, reducing blind spots and ensuring comprehensive security coverage of your property.

12MP Clarity. Day or Night.

Capture every detail in stunning 12MP HD, even in low-light conditions. Choose from multiple night vision modes: illuminate the darkness with motion-activated or always-on color night vision, or switch to traditional infrared for discreet surveillance. With adjustable brightness and a warm 3000K glow, the spotlight ensures comfortable viewing and true-to-life colors.

Rugged and Discreet

An IK10-rated housing with a small form factor allows for flexible placement in tight spaces or inconspicuous locations, blending seamlessly with its surroundings. Remain discreet and undetected, with a solution that is steadfast and tamper-proof.

Professional Installation, setup and configuration.
